

Fishers Forum

Community Resource Management: Fishermen as Scientists

Did you know that your fish can help feed more than your family? It can also help feed science! By measuring your catch's length and weight, or by tagging and releasing it, you can feed the science that keeps fishing sustainable in Hawaii.

Managing Hawaii's fisheries takes everyone's kokua. Come to the Fishers Forum and learn what you can do to help keep fish on your family's table today, and in the future.

**WHERE: ALOHA TOWER
PIER 11**

**WHEN: OCTOBER 21, 2009
6:00 TO 9:00 P.M.**

- **Get involved in managing your community's natural resources!**
- **Learn how you can participate in fisheries science through tagging, bio-sampling, and other opportunities through hands-on demonstrations!**
- **Experience a new way to enjoy your fish—through science!**
- **Find out about the latest coral reef fishery research!**

Free Validated Parking*, Giveaways and More!

Come to the Fishers Forum and Get Involved!

*Free Validated Parking Available at Aloha Tower Marketplace or Topa Center across Pier 11 only!

This Forum is part of the 146th Meeting of the Western Pacific Regional Fishery Management Council, being held October 20-22, 2009, at the Laniakea YWCA, Fuller Hall, in Downtown Honolulu, Hawaii. The Council manages offshore fisheries around Hawaii and other U.S. Pacific Islands.
