## About This Calendar

This 2010 American Samoa calendar includes updated information garnered from a traditional lunar calendar workshop convened Nov. 25, 2009, on the island of Tutuila by the Western Pacific Regional Fishery Management Council, the American Samoa's Department of Marine and Wildlife Resources (DMWR), the Office of Samoan Affairs (OSA) and the American Samoa Community College (ASCC) Samoan Studies Institute. The workshop also involved participants from other American Samoa organizations, fishermen, elders and members of the general public as well as a Fisheries Officer Tupai Ualolo from the Fisheries Division in Apia, Samoa. The Apia Fisheries Division had been instrumental in providing Samoa lunar month and moon phase names for the Council's original American Samoa lunar calendar in 2007. The ASCC Samoan Studies Institute took the lead in the research for the 2010 calendar. The workshop was convened to address informational gaps as well as the variations in the lunar month and phase names throughout the Samoa and American Samoa archipelago.

The workshop confirmed the importance of the lunar calendar. All of the participants agreed that it is a useful tool to assist in fishery management and to help villages sustain their resources. However, more research and information collection is needed to enhance the process and to address continued knowledge gaps, such as the use of a 15-month calendar by some villages. A tentative plan was devised to incrementally conduct research on the islands of Upolu with the National University of Samoa, Manu'a and Savai'i.

The moon rise and set times are for Pago Pago (Samoa standard time) from data from the U.S. Naval Observatory as provided online at <http://aa.usno.navy.mil/>.

Funding support for this calendar was provided by the NOAA Coral Reef Conservation Program.

## About the Western Pacific Regional Fishery Management Council

The Western Pacific Regional Fishery Management Council was established by Congress to manage fisheries in federal waters of the US Pacific islands. It has promoted environmentally responsible fishing for over 30 years in the State of Hawaii, Territory of American Samoa, Territory of Guam, Commonwealth of the Mariana Islands and the US Pacific remote island areas.

Management measures for fisheries in federal waters surrounding American Samoa are contained in the American Samoa Fishery Ecosystem Plan. Traditional knowledge and wide community involvement are integral parts of this place-based, ecosystem approach to fishery management.

**Front cover art:** The cover artwork was drawn by Rev. Elder Oka Fauolo, who is 80 years old, as part of the research on the lunar calendar conducted in 2009 by the American Samoa Community College Samoa Studies Institute.
