

**WESTERN  
PACIFIC  
REGIONAL  
FISHERY  
MANAGEMENT  
COUNCIL**

June, 2005

Regulatory Amendment 6 to the Pelagics Fishery Management Plan would allow Council managed vessels to use electronic logbooks to report their catch and effort. It was recommended by the Council at their 122<sup>nd</sup> meeting in March 2004 and specific operational protocols are being developed for inclusion in the regulatory amendment, which will then be transmitted to NMFS for approval and implementation.
