

US Pacific Billfish Fishery Is Sustainable, Provides Fresh Seafood and Local Revenue

HONOLULU (1 August 2018) America's seafood consumers may soon be deprived of marlin products and US Pacific Island fishing and seafood marketing communities may suffer hardship should President Trump sign legislation that would prohibit interstate commerce of American-caught billfish landed in Hawaii, American Samoa, Guam and the Commonwealth of the Northern Mariana Islands. The bill, introduced by U.S. Rep. Darren Soto's (D-Fla.), passed the House on June 26. Last October, the Senate passed similar legislation introduced by U.S. Sen. Bill Nelson (D-Fla.).

Under current law, billfish caught by U.S. vessels that are landed in Hawaii or other U.S. Pacific Islands may be sold to markets on the U.S. mainland. More than 550,000 pounds of American-caught billfish landed in the U.S. Pacific Islands are annually marketed in the continental United States. The billfish is worth approximately \$830,000 in 2017 dockside value. When the dockside value is expanded through wholesale and retail markets, the estimated annual value is approximately \$2.5 million, according to the National Marine Fisheries Service (NMFS) data.

Congresswomen Colleen Hanabusa (D-Hawaii), Madeleine Z. Bordallo (D-Guam) and Aumua Amata Coleman Radewagen (R-American Samoa), in an Additional Views statement on H.R. 4528, said the legislation "will negatively impact the livelihoods of fishermen in Hawaii, Guam and the Pacific Insular Areas by closing off the only off-island market for U.S.-caught billfish." Acknowledging that several Atlantic billfish species are subject to overfishing and stock depletion, the Congresswomen say, "We support needed-conservation efforts in the Atlantic, but do not believe that Pacific fisheries need to be targeted in order to achieve these goals."

Secretary of Commerce Wilbur Ross, in a June 5, 2018, letter to the Western Pacific Regional Fishery Management Council, said "we believe the legislation would not advance the conservation of billfish significantly, and would block a small amount of sustainably harvested domestic product from entering commerce on the U.S. mainland."

—more—

According to NMFS, in its written statement for the April 17, 2018, hearing on the legislation, with the exception of striped marlin, Pacific and Western Pacific billfish populations are not fished or subject to overfishing and are being sustainably managed.

According to the United Nation's Food and Agriculture Organization, U.S. fisheries represent approximately 1 percent of billfish captured globally.

In the United States, a Billfish Certificate of Eligibility (COE) is required to accompany billfish to any dealer or processor who subsequently receives or possesses the billfish. The COE documents the vessel, homeport, port of offloading and date of offloading.

NMFS estimates that the United States imports more than 80 percent of the seafood consumed in the nation (www.fishwatch.gov/sustainable-seafood/the-global-picture). According to NMFS data, the United States imported more than 6 billion pounds of seafood valued at more than \$21.5 billion in 2017, which is more imported seafood than at any point in the nation's history.

Background information and the agenda for the Council meeting can be found at www.wpcouncil.org or by emailing info.wpcouncil@noaa.gov.

Western Pacific Regional Fishery Management Council: Secretary of Commerce appointees from nominees selected by American Samoa, CNMI, Guam and Hawai'i governors: Michael Duenas, Guam Fishermen's Cooperative Association (Guam) (vice chair); John Gourley, Micronesian Environmental Services (CNMI) (vice chair); Dean Sensui, film producer (Hawai'i) (vice chair); Archie Soliai, StarKist (American Samoa) (vice chair); Michael Goto, United Fishing Agency (Hawai'i); Christinna Lutu-Sanchez, commercial fisherman (American Samoa). Designated state officials: Raymond Roberto, CNMI Department of Lands and Natural Resources; Suzanne Case, Hawai'i Department of Land and Natural Resources; Matt Sablan, Guam Department of Agriculture; Henry Seseapasara, American Samoa Department of Marine & Wildlife Resources. Designated federal officials (voting): Michael Tosatto, NMFS Pacific Islands Regional Office. Designated federal officials (non-voting): Rear Adm. Brain Penoyer, USCG 14th District; Michael Brakke, US Department of State; Brian Peck, US Fish and Wildlife Service.
