Nicole LeBoeuf
Assistant Administrator for Ocean Services and Coastal Zone Management
National Oceanic and Atmospheric Administration
1305 East West Highway
Silver Spring, MD 20910

Dear Ms. LeBoeuf,

The Western Pacific Regional Fishery Management Council (Council), at its 194th meeting held on March 27-28, 2023 in Saipan, CNMI and March 30-31, 2023 in Tumon, Guam, reconsidered fishing regulations for the Monument Expansion Area (MEA) of the Northwestern Hawaiian Islands (NWHI). The Council deliberated on your February 22, 2023 letter and the potential changes to its existing recommendations. After a thorough discussion that included multiple options and the opportunity to have questions answered by the Superintendent of Papahānaumokuākea Marine National Monument, the Council amended its previous recommendations made its 193rd meeting held in Honolulu, Hawaii on December 6-8, 2022, by (1) removing as a provision of the Native Hawaiian Subsistence Practices Fishing Permit cost recovery by sale while leaving barter and trade within the community, (2) removing the previous recommendation to allow cost recovery up to \$15,000 and instead providing applicants the ability to request for limited cost recovery by sale in the permit application process through a statement of need for cost recovery along with expected costs, and (3) providing that such application shall be subject to review and approval/disapproval following an interagency consultation and public review.

The Council stressed the importance of allowing limited cost recovery for Native Hawaiian subsistence fishing practices in the MEA in order for the community to participate in regulated fishing practices under Proclamation 9478. Native Hawaiians are at the top of several socio-economic indicators including the highest rates of poverty, unemployment, negative health conditions, lowest home ownership, etc., among identified ethnic groups in Hawaii. A decision to disallow cost recovery by sale will continue to disenfranchise the Native Hawaiian community. The distance from the main Hawaiian Islands to the MEA requires a large cost for fuel, bait, ice, food and other fishing needs, which would likely prohibit fishers from participating in Native Hawaiian subsistence and traditional fishing practices in the MEA.

Further, the Council believes that limited cost recovery may be conducted on a small scale within the community consistent with Proclamation 9478's prohibition on commercial fishing. We further believe that the Council's recommended prohibition on commercial gear and comprehensive process for applying and approving requests for Native Hawaiian subsistence practice permits will provide effective safeguards against commercial fishing. The Council's recommendation does not approve cost recovery by sale as described in the previous

recommendation from the 193rd Council meeting. Instead, it provides a framework for NMFS to consider the costs associated with each trip through the application process, so that a case-by-case decision may be made after consultation with other partners, including the Council, Office of National Marine Sanctuaries (ONMS), State of Hawaii, US Fish and Wildlife Service, and Office of Hawaiian Affairs. Accordingly, an application for cost recovery by sale would consider the circumstances and objectives of the particular trip, the costs incurred, and the availability of alternate sources of funding. Cost recovery also allows for the disadvantaged communities to participate in cultural and traditional fishing practices by promoting equity amongst fishers as directed by Executive Order 13985 in particular for Asian American, Native Hawaiian and Pacific Island communities as directed in Executive Order 14031.

The Council also acknowledges the comments of an independent cultural working group and their concerns regarding fishing in the NWHI, but the area under consideration is 50-200 nm from the islands that they are concerned about. Other Native Hawaiian groups have commented at the Council's recent public meetings with differing opinions and expressed the desire to fish in the MEA. However, they expressed these wishes in concert with the concern that a journey to the MEA would be financially unattainable given the cost. President Obama's proclamation intended to benefit Native Hawaiians who are not economically in the position to front those costs for a subsistence fishing trip to the MEA. Without some type of opportunity to recover costs, the intention of the Proclamation will not be met.

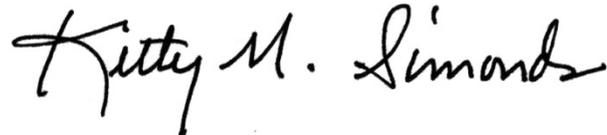

In order to provide equity for Native Hawaiian communities, the Council also recommended that funding be provided to the Western Pacific Community Demonstration Projects Program (CDPP) and Community Development Plans (CDP) under the authority of Section 305(i) of the Magnuson Stevens Act. Funding could then be used to solicit for applications to participate in Native Hawaiian fishing practices in the MEA and submitted in accordance with 67 FR 18512 (April 16, 2002). Because funds may be allocated only if available, cost recovery by sale provides an important additional safeguard. By placing the cost recovery by sale in the permit process itself, NMFS and its monument partner agencies, may consider the availability of CDP funds before determining if cost recovery will be allowed. The use of the CDP and CDPP for this purpose was supported by the State of Hawaii at this meeting.

Due to the Council's recommendation no longer explicitly allowing "sale" but providing a framework for NMFS to consider cost recovery, the Council believes that the recommendation is consistent with the goals and objectives of the proposed sanctuary. In particular, this framework provides for partnership and constituent engagement (Goal 4) through a consultation process and public review; Supports and maintains existing co-management functions to ensure seamless integrated stewardship (Objective 3) through the inclusion of management partners in the consultation process; Allows for input through the application process to provide Native Hawaiian management concepts and principles (Objective 5); and Enhances community involvement through providing a public review and commenting process and providing opportunities for economically disadvantaged communities to access cultural practices through cost recovery (Objective 6).

The attached document provides the final recommendations for fishing regulations in the Monument Expansion Area of the Northwestern Hawaiian Islands. The Council believes that in the development of the MEA President Obama's Proclamation 9478 intended to allow for sustainable fishing and that any attempt to reduce that opportunity clashes with that intent. If

you have any questions, or if you would like to discuss the Council recommendations further, please give me a call at the Council Office, (808) 522-8220.

Sincerely,
