Pacific  
Regional  
Fishery  
Management  
Council**

April 14, 2023

Nicole LeBoeuf  
Assistant Administrator for Ocean Services and Coastal Zone Management  
National Oceanic and Atmospheric Administration  
1305 East West Highway  
Silver Spring, MD 20910

Dear Ms. LeBoeuf,

The Western Pacific Regional Fishery Management Council (Council), at its 194<sup>th</sup> meeting held on March 27-28, 2023 in Saipan, CNMI and March 30-31, 2023 in Tumon, Guam, reconsidered fishing regulations for the Monument Expansion Area (MEA) of the Northwestern Hawaiian Islands (NWHI). The Council deliberated on your February 22, 2023 letter and the potential changes to its existing recommendations. After a thorough discussion that included multiple options and the opportunity to have questions answered by the Superintendent of Papahānaumokuākea Marine National Monument, the Council amended its previous recommendations made its 193<sup>rd</sup> meeting held in Honolulu, Hawaii on December 6-8, 2022, by (1) removing as a provision of the Native Hawaiian Subsistence Practices Fishing Permit cost recovery by sale while leaving barter and trade within the community, (2) removing the previous recommendation to allow cost recovery up to \$15,000 and instead providing applicants the ability to request for limited cost recovery by sale in the permit application process through a statement of need for cost recovery along with expected costs, and (3) providing that such application shall be subject to review and approval/disapproval following an interagency consultation and public review.

The Council stressed the importance of allowing limited cost recovery for Native Hawaiian subsistence fishing practices in the MEA in order for the community to participate in regulated fishing practices under Proclamation 9478. Native Hawaiians are at the top of several socio-economic indicators including the highest rates of poverty, unemployment, negative health conditions, lowest home ownership, etc., among identified ethnic groups in Hawaii. A decision to disallow cost recovery by sale will continue to disenfranchise the Native Hawaiian community. The distance from the main Hawaiian Islands to the MEA requires a large cost for fuel, bait, ice, food and other fishing needs, which would likely prohibit fishers from participating in Native Hawaiian subsistence and traditional fishing practices in the MEA.

Further, the Council believes that limited cost recovery may be conducted on a small scale within the community consistent with Proclamation 9478's prohibition on commercial fishing. We further believe that the Council's recommended prohibition on commercial gear and comprehensive process for applying and approving requests for Native Hawaiian subsistence practice permits will provide effective safeguards against commercial fishing. The Council's recommendation does not approve cost recovery by sale as described in the previous

recommendation from the 193<sup>rd</sup> Council meeting. Instead, it provides a framework for NMFS to consider the costs associated with each trip through the application process, so that a case-by-case decision may be made after consultation with other partners, including the Council, Office of National Marine Sanctuaries (ONMS), State of Hawaii, US Fish and Wildlife Service, and Office of Hawaiian Affairs. Accordingly, an application for cost recovery by sale would consider the circumstances and objectives of the particular trip, the costs incurred, and the availability of alternate sources of funding. Cost recovery also allows for the disadvantaged communities to participate in cultural and traditional fishing practices by promoting equity amongst fishers as directed by Executive Order 13985 in particular for Asian American, Native Hawaiian and Pacific Island communities as directed in Executive Order 14031.

The Council also acknowledges the comments of an independent cultural working group and their concerns regarding fishing in the NWHI, but the area under consideration is 50-200 nm from the islands that they are concerned about. Other Native Hawaiian groups have commented at the Council's recent public meetings with differing opinions and expressed the desire to fish in the MEA. However, they expressed these wishes in concert with the concern that a journey to the MEA would be financially unattainable given the cost. President Obama's proclamation intended to benefit Native Hawaiians who are not economically in the position to front those costs for a subsistence fishing trip to the MEA. Without some type of opportunity to recover costs, the intention of the Proclamation will not be met.

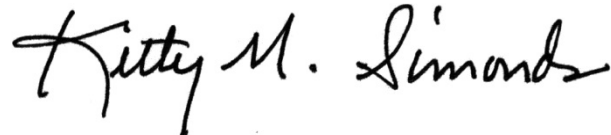

In order to provide equity for Native Hawaiian communities, the Council also recommended that funding be provided to the Western Pacific Community Demonstration Projects Program (CDPP) and Community Development Plans (CDP) under the authority of Section 305(i) of the Magnuson Stevens Act. Funding could then be used to solicit for applications to participate in Native Hawaiian fishing practices in the MEA and submitted in accordance with 67 FR 18512 (April 16, 2002). Because funds may be allocated only if available, cost recovery by sale provides an important additional safeguard. By placing the cost recovery by sale in the permit process itself, NMFS and its monument partner agencies, may consider the availability of CDP funds before determining if cost recovery will be allowed. The use of the CDP and CDPP for this purpose was supported by the State of Hawaii at this meeting.

Due to the Council's recommendation no longer explicitly allowing "sale" but providing a framework for NMFS to consider cost recovery, the Council believes that the recommendation is consistent with the goals and objectives of the proposed sanctuary. In particular, this framework provides for partnership and constituent engagement (Goal 4) through a consultation process and public review; Supports and maintains existing co-management functions to ensure seamless integrated stewardship (Objective 3) through the inclusion of management partners in the consultation process; Allows for input through the application process to provide Native Hawaiian management concepts and principles (Objective 5); and Enhances community involvement through providing a public review and commenting process and providing opportunities for economically disadvantaged communities to access cultural practices through cost recovery (Objective 6).

The attached document provides the final recommendations for fishing regulations in the Monument Expansion Area of the Northwestern Hawaiian Islands. The Council believes that in the development of the MEA President Obama's Proclamation 9478 intended to allow for sustainable fishing and that any attempt to reduce that opportunity clashes with that intent. If

you have any questions, or if you would like to discuss the Council recommendations further, please give me a call at the Council Office, (808) 522-8220.

Sincerely,

## **WPRFMC Recommendations for Fishing Regulations in the Monument Expansion Area**

The Council stressed the importance of allowing cost recovery for fishing in the MEA in order for the community to participate in the fishery. Native Hawaiians are at the top of several socio-economic indicators including the highest rates of poverty, unemployment, negative health conditions, lowest home ownership, etc. A decision to disallow cost recovery, including sales will continue to disenfranchise the Native Hawaiian community. The Council believes that limited cost recovery may be conducted on a small scale within the community consistent with Proclamation 9478's prohibition on commercial fishing. We further believe that the Council's recommended prohibition on commercial gear and comprehensive process for applying and approving requests for NH subsistence practice permits will provide effective safeguards against commercial fishing. The distance from the Main Hawaiian Islands to the MEA requires a large cost for fuel, bait, ice, food and other fishing needs may prohibit fishers from participating in Native Hawaiian cultural and traditional fishing practices in the MEA. Cost recovery allows for the disadvantaged communities to participate in cultural and traditional fishing practices by promoting equity amongst fishers as directed by Executive Order 13985 in particular for Asian American, Native Hawaiian and Pacific Island (AANHPI) communities as directed in Executive Order 14031. The Council also acknowledges the comments of an independent cultural working group and that other Native Hawaiian groups have commented at the Council's recent public meetings with a differing opinion.

Regarding NWHI fishing regulations for the Monument Expansion Area, the Council recommended amending the Hawaii and Pelagic Fishery Ecosystem Plan (FEP) to prohibit commercial fishing and allow for sustainable non-commercial fishing and Native Hawaiian subsistence fishing practices in the Monument Expansion Area (MEA), including bringing back resources to the Main Hawaiian Islands (MHI). Fishing regulations would include:

- **Commercial Fishing Prohibition:** Commercial fishing as defined in 50 CFR 665 – Western Pacific Fisheries would be prohibited in the MEA.
- **Allowable Species:** Only Hawaii bottomfish management unit species (MUS) as defined at [50 CFR 665.201](#) and western Pacific pelagic MUS as defined at [50 CFR 665.800](#) would be allowed to be caught in the MEA. Fishing for all other Hawaii FEP MUS and Hawaii FEP ecosystem component species (ECS), as defined in [50 CFR 665 - Subpart C, Hawaii Fisheries](#) would be prohibited.
- **Allowable Gear Types:** Only handline, hook and line, rod and reel and spear as authorized at [50 CFR 600.725 – General Prohibitions](#) would be allowed to be used to catch bottomfish MUS and pelagic MUS in the MEA. All other gear types, including longline, bottom set longline, trawl and poisons would be prohibited from use in the MEA.

- Catch Limits: Establish a preliminary annual catch limit for bottomfish MUS at 350,000 lbs. and pelagic MUS at 180,000 lbs. for the MEA. NMFS and the Council would monitor catches from within the original monument authorized by NOAA, and in the MEA authorized by NMFS towards this limit. As an accountability measure (AM), if NMFS forecasts the limit would be reached NMFS would prohibit all fishing in the MEA for the remainder of the fishing year.
- NMFS and the Council will annually report fishery performance (e.g., number of permits issued, catch and effort information, etc.) in the annual Hawaii FEP and Pelagics FEP Stock Assessment and Fisheries Evaluation (SAFE) Reports. NMFS and the Council will also evaluate fishery performance after an appropriate time not to exceed 5 years from the effective date of the fishery regulations and will continue to conduct evaluations as necessary in order to ensure the resources are managed sustainably. Such evaluations will take into consideration the best scientific information available and evaluate whether additional specific actions are necessary for the proper care and management of monument objects, including fishery resources, consistent with Proclamation 9478.
- Non-Commercial Fishing Permit and Reporting: Any person engaging in non-commercial fishing in the MEA must obtain a MEA non-commercial fishing permit and comply with reporting and record keeping requirements codified at [50 CFR 665.14 – Reporting and Recordkeeping](#), as required for all Magnuson-Stevens Act permits issued by NMFS.
- Disposition of Non-Commercial Catch: Bottomfish MUS and pelagic MUS legally caught by an individual holding a valid MEA non-commercial fishing permit may be brought back to the MHI for consumption, including community sharing. However, fish caught from within the MEA under this permit cannot enter commerce through sale, barter, or trade and may not recoup costs associated with the trip to the MEA.
- Native Hawaiian Subsistence Practices Fishing Permit Application Process: An applicant for a Native Hawaiian Subsistence Practices Permit must complete and submit an application to NMFS that includes, but is not limited to a statement describing the objectives of the fishing activity for which a permit is needed, including a general description of the expected disposition of the resources harvested under the permit. If cost recovery is requested through sale, the application must include estimated costs for fuel and ice, and other trip costs to make a trip from the main Hawaiian Islands to the MEA along with a statement explaining why cost recovery is necessary for the intended action.
  - If an application contains all of the required information, NMFS will forward copies of the application to the Council, the USFWS, the ONMS, the Office of Hawaiian Affairs (OHA), and the Chair of the Hawaii Department of Land and Natural Resources. The Council may consult with any of its Federal Advisory Committee Act (5 U.S.C. App. 2) exempt advisory bodies established pursuant to Section 302(g) of the Magnuson-Stevens Act to provide comments on the application. NMFS will also make the permit application available for public review for no less than 30 days.
  - Within 30 days following receipt of a complete application, NMFS will consult with the Council through its Executive Director, and the USFWS, NOAA Office of National Marine Sanctuaries (ONMS), Office of Hawaiian Affairs (OHA), and the Chair of the Hawaii Department of Land and Natural Resources (DLNR) concerning the permit application and will receive their recommendations for approval or disapproval of the application.

- Disposition of Native Hawaiian Subsistence Practices Catch: Bottomfish MUS and Pelagic MUS legally caught by an individual holding a valid MEA Native Hawaiian Subsistence Practices fishing permit may bring catch back to the main Hawaiian Islands for consumption, including community sharing, barter and trade. Additionally, permittees may request NMFS consider the ability to recover costs through sale of catch associated with the trip to the MEA.
- Trip Mixing: To ensure fish caught from inside the MEA for non-commercial and Native Hawaiian practices are not commingled with fish caught commercially seaward of the MEA, NMFS and the Council would prohibit any person from fishing both inside and outside the MEA on the same trip. Similarly, to ensure fish caught inside the original monument area for sustenance purposes are not commingled with fish caught in the MEA for non-commercial and Native Hawaiian practices and sharing in the MHI, NMFS and the Council would prohibit any person from engaging in both non-commercial fishing inside and outside the MEA as well as sustenance fishing in the original monument area on the same trip. However, sustenance fishing in the original monument and MEA on the same trip shall not be prohibited.
- Observer and VMS Requirements: All fishing vessels must carry an activated and functioning NOAA-provided VMS unit on board at all times whenever the vessel is in the Monument, and an observer if directed to do so by NMFS.
- Notification: Permit holders must notify NMFS prior to making any fishing trip to the MEA so NMFS may place a VMS unit and/or an observer on board as directed. Additionally, permit holders must contact NMFS at least 24 hours before landing any catch harvested under an MEA permit, and report the port and the approximate date and time at which the catch will be landed.
  - Other Requirements: All fishing vessels must also comply with regulations codified at 50 CFR 665 – Western Pacific Fisheries applicable in the Exclusive Economic Zone (EEZ) comprising the MEA.

Kitty Simonds  
Executive Director  
Western Pacific Regional Fishery Management Council  
1164 Bishop Street, Suite 1400  
Honolulu, HI 96813

Dear Ms. Simonds:

This letter responds to the Western Pacific Regional Fishery Management Council's (Council) final action taken at the 194th Council meeting as detailed in your April 14, 2023 letter to NOAA, amending the Council's prior December 2022 action for the Papahānaumokuākea Monument Expansion Area (MEA).

NOAA finds that, with the exception of the recommendation providing Native Hawaiian Subsistence Practices Fishing Permit applicants the ability to request limited cost recovery by selling their catch, the Council's amended recommendations fulfill the purposes and policies of the National Marine Sanctuaries Act (NMSA) and the goals and objectives of the proposed sanctuary. As detailed in NOAA's February 22, 2023 letter, any recommendation for the allowance of "sale" is inconsistent with the goals and objectives of the proposed sanctuary. Accordingly, NOAA rejects that portion of the Council's recommendation providing Native Hawaiian Subsistence Practices Fishing Permit applicants the ability to request limited cost recovery by selling their catch. This finding concludes the NMSA section 304(a)(5) process for the purpose of the proposed sanctuary designation within Papahānaumokuākea Marine National Monument.

Per the NMSA section 304(a)(5), based on this finding, NOAA will begin to prepare regulations under the Magnuson–Stevens Fishery Conservation and Management Act, for those parts of the Council's recommendations that it has accepted.

Coordination with the Council under the NMSA section 304(a)(5) for the proposal to designate marine portions of Papahānaumokuākea Marine National Monument as a national marine sanctuary has been a critical step in the proposed sanctuary designation process. On behalf of NOAA, I would like to thank the Council for its time and effort in this matter.

Please contact Kristina Kekuewa at [Kristina.Kekuewa@noaa.gov](mailto:Kristina.Kekuewa@noaa.gov) if you have any questions or require more information.

Sincerely,

Nicole R. LeBoeuf  
Assistant Administrator  
for Ocean Services and Coastal Zone  
Management
