E-mail: info@wpcouncil.org

Ms Kitty Simonds,

As it relates to Tuna Fishing, I support the restoration of commercial fishing by removing existing prohibitions in the [Expanded Areas of the Pacific Islands Heritage Marine National Monument](#)

The prohibitions do not protect the environment or tuna resource in any manner. Tuna is a non-reef deep water fishery and excluding US tuna vessels does nothing to protect the fishery or the environment.

I am not telling you anything you do not already know, I am only voicing my strong support to restore fishing by removing the prohibitions that do not serve a purpose.

Bill Sardinha

US Tuna Corporation
